

How to Build Your Own Front Panel in 3 Easy Steps

With minimum quantity requirements and a complex submissions process, it can be hard to get a prototype or a weekend project off the ground without breaking the bank. Front Panel Designer is made for ease and simplicity in mind, unifying the design and ordering process so you can get the panel you need as soon as possible. Here's how it works:

1. Download Front Panel Designer

You can use Front Panel Designer for free with no obligation. Designed to be logical and easy to operate, Front Panel Designer is the perfect program to visualize, design, and finalize your ideas without the need for exporting or converting to other formats. Download the full version [here](#).

2. Create Your Own Design or Use a Template

Starting from scratch can be daunting. That's why we offer free templates to use as a reference point in designing your own enclosure, panel, or nameplate. You can find them [here](#).

3. Pay and Ship

Front Panel Designer automatically itemizes and instantly updates the total price of your component. And because every aspect of your order is included in the program, there's no buggy shift to an external browser or hiccup with logins - we've unified the entire process so you can see exactly what you're paying for and what the status of your order is as it currently stands.

Whether you're a first-timer or a veteran of the industry, you owe it to yourself to try Front Panel Designer. See what others have [said about their experiences](#) and [download the program](#) risk-free today!
