I'd like to know if you can work with a pre-made 19" rack panel. The rack chassis' that I buy have removable front and rear panels with flanges (to hold the lids) that run the length of the panels.

Here's a picture of what I'm talking about:

Here's the dimensions of the panels:

Obviously I've already drilled the panel on the left, but the panels come with the 19" rackmounting holes and chassis assembly holes pre-drilled.

It would be absolutely great if you can work with these as it would make my life much easier.

Let me know,

Jason

Yes, we definitely can work with those panels, and if required even on the back side (e.g. for removing some of the flange in certain areas)

Regards,

Diane

Regards,

Diane That's fantastic news. I'm sure my clients will be happy to hear this.
