Trouble importing dxf files

Hello,

I have been trying for 3 days to import dxf files defining 2 panels. Each file appears to have different, yet related, errors preventing the upload from completing, and no amount of editing changes the errors. Please help.

Hello,

I am sorry that you have difficulties with the import. Why don't you email me the dxf files and have me find the problem? Please send to my attention at info@frontpanelexpress.com

Kind regards,

Diane

Hi Diane,

I am having a very similar problem importing a dxf file. I continue to get "an error occurred. The DXF file could not be imported" messages.

May I send you my own problem dxf file?

Thank you,

Brian

Of course Brian. Most of the time it is just a doubled line or a contour that is not closed. I am happy to check it out for you.

Kind regards,

Diane
