Machine Parts

We can machine a wide variety of shapes with our modern milling technology. Take advantage of the flexibility of Front Panel Designer and create custom milled parts with thicknesses of up to 10mm.

Use the entire range of features in our software and import exterior or interior shapes via dxf file. Design your components with drill holes, cutout, etc. to meet your specific needs. A large selection of materials is available for this purpose ranging from aluminum and brass through to acrylic and PVC. [Contact us](#) for details.
