

Disclaimer of Warranty

1. Online Content

The author shall not be responsible for the correctness, completeness or quality of the information provided, or that such information is up to date. Liability claims against the author concerning material or immaterial damage caused by the use or non-use of the provided information and/or by the use of incorrect or incomplete information are strictly excluded, insofar as there is no evident deliberate or grossly negligent fault of the author.

All services offered are subject to confirmation and are not binding. The author explicitly reserves the right to change, complete, delete or stop the publication of the complete web page or parts of it finally or for a certain period of time without prior announcement.

2. References and Links

Liability for direct or indirect references to external web pages ("hyperlinks") that are beyond the author's area of responsibilities becomes effective only if the author is aware of the content and if it would have been technologically possible and reasonable for the author to avoid the use of any illegal content. The author hereby explicitly declares that, as of the time of the linking, there was no recognizable illegal content on the linked web pages. The author has no influence on the current or future design, content or authorship of the linked web pages. Therefore, the author explicitly distances himself from all content on linked pages that change after the linking. This statement applies to all links and references within the author's own Internet services as well as for external comments in guest books, discussion boards or mailing lists established by the author. This shall also apply to all other forms of databases with external writing access. The party responsible for illegal, incorrect or incomplete information, especially for damages caused by the use or non-use of such information, is the provider of the page to which the reference is made and not the party who merely refers to that page.

3. Copyright

The author shall endeavor to observe in all publications the copyright of the used images, graphics, audio files, video files and text files, to use images, graphics, audio files, video files and text files developed by the author himself or to use images, graphics, audio files, video files and text files free of licenses.

Any and all trademarks and brand names mentioned in the Internet publication, which might be protected by third parties, shall be unrestrictedly subject to the provisions of the applicable trademark law and the property rights of the respective registered owner. The mere mentioning of a trademark does not mean that said trademark is not protected by third party rights.

The copyright of published objects, developed by the author himself, remains exclusively with the author of the pages. Copying or using those graphics, audio files, video files and text files within other electronic or printed publications is allowed only with the author's prior consent.

4. Data protection

If there is a possibility to enter personal or business data (email addresses, names or addresses) within the Internet presence, the user provides those data voluntarily. The use of and payment for all offered services shall - as far as technically possible and reasonable - also be possible without indicating such data and/or declaring anonymized data or aliases. The use of contact information published in the

publishing details or similar information, such as mailing addresses, telephone and fax numbers and email addresses, by third parties for sending information not explicitly ordered, shall not be allowed. The right to take legal steps against senders of so-called spam mails violating this prohibition shall be explicitly reserved.

5. Legal validity of this disclaimer

This disclaimer is to be regarded as part of the Internet publication from which you were referred here. If sections or individual terms of this statement do not, do no longer or do not completely correspond to the legal situation, the content or validity of the other parts remain uninfluenced by this fact.
