### Chrome

Can you do chrome plating? If not, do you plan on providing this in a future?

### Question about templates

Should the width of the side panels be the same as the cover panels?

I ask because in the templates the cover width,(top+bottom) is 85.80mm and the side panel width,(front+back) is 100mm

Using profile2 for the enclosure templates.

I need to adjust the top+bottom width to 70mm

So should I adjust the front+back panels width to 70mm?

Or should it be 84.2mm? to make up the 14.2mm difference?

### Custom enclosure

I am trying to build a rack mount enclosure that is about 20 inches long and I am working on the front panel now. How do I make the side and back panels to fit without using a template because none of the templates fit the size that I need?

### Logo JPG

Hello,

It is possible to incorporate a logo in JPG format to the designs of my panels?

Best regards

Josep

### saving files

In previous version, it was possible to set the default location for saved files. I'd like to see this back.

Also the Recent Files header is a bit sloppy. Why not put recently opened files directly at the bottom like most other software.

Thanks

### Panel Color

would it be possible to add white to the color selection. i sure would appreciate it.

thanks,

RH
