Unicode Characters

Is it possible to use unicode characters for text engraving? Everything I'm trying is translating to a "?" character.

User supplied material

I'd like to supply a front panel from a Par-Metal case with a thickness of 0.125". This isn't an option in the thickness drop down in the front panel properties. Can I still use it, and if so, what thickness should I select? Thanks!

Brass engraving

I'm interested in making some small engraved plates out of brass. Do you stock brass sheet (for instance .032 or .040), or would I have to supply the material? Any idea how this might affect cost vs. your standard aluminum?

Sample projects.

I found this program via a post by Scott Dupuie AK5SD a fellow ham radio operator. He designed a panel for an Elecraft KX3 radio and would like to know if you may have this panel or similar projects available to use? Thank you.

Bending text. Fonts

Can text be bent to a curve. And....
Is there a font library I can view?

graphic files library

Where can I find a graphic file library?
I am in need of some rotary switch graphics including a 12pos switch.
