[Ordering from Canada?](#)

Hi

I found your website by chance a few months ago, and have just returned to find it completely redone. Very nice!

I have a few personal projects on the go that could really benefit from you services. Do you take orders from Canada?

Thanks

User Supplied Material

I'd like to know if you can work with a pre-made 19" rack panel. The rack chassis' that I buy have removable front and rear panels with flanges (to hold the lids) that run the length of the panels.

Here's a picture of what I'm talking about:

Here's the dimensions of the panels:

Obviously I've already drilled the panel on the left, but the panels come with the 19" rackmounting holes and chassis assembly holes pre-drilled.

It would be absolutely great if you can work with these as it would make my life much easier.

Let me know,

Jason
