### side & housing profile colors

Hi,

do the side and/or housing profiles come in different colors, in particular, medium bronze, thanks.

### Add Guidelines?

Is there a way to add guidelines to a project?

### Filling Curved Slots

When adding a curved slot from the menu, I don't see a means to fill the slot with colors like other engravings. How is that accomplished and what is the default? Thanks!

Paul

### Limitations on in-fill

According to the "Design check" help topic: "Are the engraving objects positioned in such a way with respect to drilled holes, cutouts or cavities that the color in-fills cannot leak?"

What is the limitation vis-a-vis in-filled engraved lines vs cutouts to avoid leaking if the in-fill color?

### error starting the ordering program

I attempted to order a panel and am getting the error messages below when I try to start the ordering program. I had just ordered some other panels a week or so ago and had no problems. It happens if I select 'order the current panel' or 'start the ordering program'. This is on a windows 7 machine and it's fpd 4.31. I tried re-booting my PC and also re-installing FPD. Any idea what the issue might be?

Thanks

Phil
