Hi Paul,

Here is the link to the Scale Generator script:

[www.frontpanelexpress.com/downloads/scripts/](http://www.frontpanelexpress.com/downloads/scripts/)

Click 'download script' and then run it from the folder it downloaded to.

If you have any other questions email us back at [info@frontpanelexpress.com](mailto:info@frontpanelexpress.com)

- [6.1.1 on Mac Mojave](#)

I've updated to the latest version (6.1.1) of FPD and while I can design a panel with no issues, I continue to get this error message:

"ALERT: this price calculation is no longer valid. Please download the current version of Front Panel Designer".

I've reinstalled version 6.1.1 three times now with the same results. When I click on the "About" menu, it tells me I'm running version 6.11.

What's up here?

- **Anodized Aluminum Panel w/ White Background**

Hello! Is there any way to have full-color imagery with a white background printed on anodized aluminum (rather than choosing powder-coated aluminum, which cannot have graphics printed on)?

- **HPGL**

I have a simple line drawing that I might want to include as an engraving on a front panel I'm working on. I have jpg and pdf files, but can't seem to find a free program to convert either of the files to HPGL. If anybody knows of one, I'd be grateful.

Another idea: I read a post here that leads me to believe FP Express will do the conversion and include it in the design, but I'd like to be able to see it on the cad program so I could mess around with it before deciding if, and how, to include it in the design.

- **FPD files win/mac**

Hi,

I have a Win machine in my office and a Mac at home, both have version 6.01 installed, but I can't open the files saved under Win on my Mac, it says, I need a newer version. Any ideas?

- **15 pin high density D connector cutout**

I'm looking for a VGA type D connector cutout with 15 pins in three rows. Has anyone made one of those?
