4.2 files corrupt

I just installed v4.2. Opened a file and modified it. I saved the file, and closed it. Now when I try to open it I get a file is corrupt error. It has happened on three files in total now.

Engraving on User Panel With 2.5mm Edge?

Good Day,

I have a panel (steel) which has a 2.5mm lip on the top and bottom running the length of the panel. Is it possible to do any engraving on this panel, or does the lip keep the tools from correctly reaching the panels? (as in: do I really need to use a flat panel?)

Many thanks!

Brian

Insert free contour as svg

Great software! Thanks You!

I work with MacOSX

Your Insert free contour is a great feature , but I have problems getting dxf files from my other cad programs on MacOsx.

You support export of SVG and dxf so its great to connect to additional programs.

Could it be possible for You to add the ability to import "svg" files as well at the contour part not only dxf. This might be much easier than support eps files for Mac.

That would help me a lot to make more Macro Parts much faster with other Cad Programs. I use "TouchDraw" now.

Thank You again!

Adobe Illustrator Mac OSX export for FrontDesign

Hi All

I have a front view I made with Adobe Illustrator MAC OSX (CS5 15.1.0) and I would to import it for order to Front panel express, but it doesn't works or I don't know I do that.

I try to open my dxf or dwg with frontdesign but it told me this is not a front panel !! somebody tell me if this the good condition or if I make a mistake.

Hope to read you and have your help.

anodefr@free.fr

Sincerely

Anode

Thru holes

When I enetr a thru hole, regardless of size, the depth dialog sub-box is grayed out with a 1.27 depth dimension. So while the pictorial cleary shows that I am creating a thru hole, this does leave me with a bit of angst. Especially as I am a new user. Would perhaps be nice, for clarity and completeness, if the "insert drill hole" clearly specified "thru hole" per selection.

dxflplt import

Hello,

Import logo as dxf or plt files to engrave it, however it doesn't appear in preview window.

What is wrong?
