3d import

Are you ever going to have a 3d import for your program. Most people that are designing panels or enclosures are designing with Solidworks or some other 3d software. Do you plan to add 3d import to your software?

Origin Placement Issues

Upgraded to v4.50 on a Mac. Now manually setting the origin coordinates does not work. Also, snapping origin to an object reference point no longer works. Downgraded to v4.42 to restore usability.

reference points in SVG?

Hi,

I've noticed that reference points are not exported any more since version 4.5 update...
Is it possible to set it up somehow?

Milled Text

I want to place text on a panel that is in front of eliminated plexi. The text in the panel should therefore be completely milled, not just engraved. How do I set this in the front panel designer?

Thanks,
Stijn

won't load

After upgrading to the latest version, FPD won't load now. When I try to re-install I get an error message that it can't open the .exe file.
