Housing Profile Colors

I was wondering if it is possible to get the housing profiles in something other than Natural or Black anodized?

In my upcoming project I am looking at creating an internal box within the main enclosure. The main enclosure will be black, but I was thinking of making the internal box out of gold anodize paneling. I will be using two Housing Profile#1's as part of this internal box. It would be great if they too could be gold anodize to match the panels. Is this possible? And if so, what would be the extra cost?

Partial Panel Replacement

I have an older partial panel that I would like to replace as is. Could I just send that partial panel in to you and have you make me one just like it?

Adobe Illustrator Import ?

Hi all I do a front panel via Adobe Illustrator and I would want to import in FrontDesign for factoring.

It seems to be not possible !!! does anyone have an experience for Importing ?

Thanks by advance

Ritchie

Outside corners not showing

I typed in the outside corner radii, yet they did not stay in the entry boxes nor did they appear on the screen.

I loaded a design from two years ago and the corners show on it.

The previous design used 1.5mm anodized (which I see is no longer available).

I have searched help and the forum yet cannot find an answer.

Does anyone know why is this happening?

Help on design cut out for display board

Hi - can you help me with a design question. I am designing a button plate for a steering wheel and one of the components to be mounted on the back face of the plate is a display board (led's, lcd's). I have a template but am not confident I can get the exact dimensions and distances between the led lights for the cut outs. Thing is you have already made a button plate for another customer with the same cut out as he is using the same display board I want to use. I would upload the template picture but there is no option for me to do that I have attached an image of the actual board below. I believe your American division manufactured the plate so is there any way you can check with them to see if they have any documentation regarding the actual dimensions. If you could enquire that would be a real help.

If there is a contact address I can send the .dwg to you for the board if that helps

Thanks

Simon.

Can a powder-coated panel be engraved?

Hi,

Subject line pretty much says it all. I've had several panels done by FPE but I've never tried your powder-coat finishing. Is it possible to engrave a powder-coated panel?

Thanks--

--Adam
