Scale Generator

How do you install and run Scale Generator?

Posted By: Don Cleveland on Nov 07, 2008 08:05PM Category: Front Panel Designer

[Reply](#)

Scale Generator is based on java script, and requires the Java runtime to be installed to allow it to execute.

If you already have Java installed you should be able to double-click the jskala_english.jar file to launch it.

If you don't have Java installed, the simplest way to get it is to visit [http://www.java.com](#), click the 'Java Software Free Download' link in the top-left and follow the instructions there.

Hi Don,

the download for the Scale Generator can be found in the Tips & Tricks section.

Here is the [link](#) for your convenience.

I have down loaded, and unzipped a second time, but I don't find a jskala_english.jar file. I have Java 6 installed, I can't figure out what I'm doing wrong.

I've searched, but cannot find jskala_english.jar, is it part of the Zip file?

It looks like this problem only occurs when using Internet Explorer for the download.

Our IT department will have a look on it. I will let you know as soon as this problem is resolved.

I have sent the file directly to your email address, please let me know if it works for you this way.

I apologize for any inconvenience.
