Matching paints

Are there any off the shelf spray paints that are close to the colors you offer on your panels? The Red, blue, black, gold, green, etc... ?

Can't create a new file after downloading 6.2.1

After downloading the latest version, I can't create any new files because the bottom portion of the 'Properties' page is missing. Is there a glitch in the new version? I'm running Windows 7.

Machine Opposing Edges

Not sure how to set this up... I have inserted a rectangular hole. On one side of the rectangle I need to machine a bevel on the front edge, then on the opposing side of the rectangle I need to machine a bevel on the rear edge. Basically - i am trying to create angled slots for ventilation that help to hide the internals (similar to an air register in the home). Any suggestions on this?

Printing for panel fit check

Prior to upgrading to 6.1.2 I was able to print a copy of the panel I was designing.

I'm on 6.1.2 and using a project from an older version and now when I try to print the panel I'll get only a blank sheet of paper. I looked around at the settings and it appears that the panel preview is present but it appears as one tile of many that need to be printed.

Can you help figure this out?
