### [Please consider different method of updating pricing](#)

Just a suggestion - many of us have stringent IT policies that mean new versions of software must be white listed before installed, and this process can take weeks if not months. The ability to import a current pricing file would be a huge help.

Thanks for the consideration.

### [HPGL file corrupted on import](#)

I take an Autocad .dwg file, open it in ABViewer, then save it as an HPGL (.plt) file. When I try to import it as an HPGL engraving, the preview window shows it as a bunch of lines going every which way.

Attached File: [0141A01\\_Legend2.plt](#)

### [Apostrophe Conversion](#)

Folks:

I've used FPD for years on a PC and have now migrated to running FPD v.6.21 on a new MacBook Pro. My latest front panel design has text engraving on the panel. The text includes an apostrophe (the text is "Engineer's Amp"). Curiously, while the text shows properly in the text box, in both the preview window and on the panel FPD converts the apostrophe to a question mark (i.e., "Engineer?s Amp"). The conversion cannot be corrected.

What's going on?

Regards,  
Scott

### Toolbar

I feel like an idiot not being able to figure this out, but I am new to FPE and cannot figure everything out.

I accidentally closed out of the toolbar on the left side that allows you to place entities a certain distance from the origin. Now that I have closed out of it, I have no way of placing items exactly where they need to be, and I cannot figure out how to get this toolbar back.

Can someone help with this?

### Matching paints

Are there any off the shelf spray paints that are close to the colors you offer on your panels? The Red, blue, black, gold, green, etc... ?

### Can't create a new file after downloading 6.2.1

After downloading the latest version, I can't create any new files because the bottom portion of the 'Properties' page is missing. Is there a glitch in the new version? I'm running Windows 7.
