Order From Quote

If my purchasing department prefers to order from an official quote, what is the best way to do this? I understand how to request the quote using the ordering application. Once I have received it what are the next steps my purchasing department needs to take to place an order from that quote?

Cases- removable top?

I just ordered my first panel and will be addicted to your service in the future. However I didn't order any of your cases since it seems both designs do not allow easy removal of the top plane of the case without first removing the front or back. Is this correct? If so, you may want to considering having a case option that one can easily 'remove the top' so as to work on a system without removing the front or back first. When demoing prototype products (what I would use your service for), the extra disassembly makes the device seem clumsy, which is what I am (presumably) paid to avoid.

Thanks again!

Return shipping label

Is it possible for you to use an included return shipping label when receiving our materials?

Switch Panel

Hi, I'm trying to duplicate the switch panel that is shown on the RH side of the attached picture. Is it possible you could do something like that?

arcs from engraved circles?

I wish to have a means of creating an arc of a circle of less than 360 degrees (viz. the arc of a 320 degree Potentiometer)
