Front Panel Designer Tutorial

Hi

I downloaded the Front Panel Designer but does anyone know where I can download and read the tutorial before I can use it?

User-Provided Material

Why does FPD reject 10mm anodized material provided by the user? FPD issues an error message with the combination of 10mm panel and color black is selected. The message says that 4mm is the maximum panel thickness for anodized black. I'd understand if FPE did not have 10mm anodized black stock, but I am supplying the material.

dxfrustration

Hi! I have used FPE over the years for my production needs and I have NEVER, never ever; no matter how I export and how I prep the data- never been able to import a dxf exported from illustrator. I am trying to design some from panels for 2 new products and am completely blocked by this. I contacted support and was curtly pointed to the pdf guide, which tells me nothing about file preparation (and that I've read, and then told it would be 100\$ an hour for possibly 3 hours of work to get a simple dxf outline into front panel designer.

Does anyone have a succinct set of operations to perform in order to get a simple curved outline out of illustrator and into FPE using DXF? Paying 300\$ per set of outlines will be a bit steep.

Anyway here's the perpetual error:

Front Design launch problem

hello... I have ordered dozens of panels over a dozen years... and never had this issue...

I get a pop up that says:

the current issue of front panel designer is not reacting. please close all dialog boxes and try again.

the program was running when I had a crash... it spun endlessly, so I had to force quit... now it will not open... I rebooted computer.. I dragged the old program to the trash... downloaded again... and reinstalled... still nothing... I found the Applications Support folder, but could not see any old files to delete...

I sent an email yesterday. no reply...

any help appreciated...

Mac 10.13.1

power connector for FrontDesign

Is there a macro element I can install for a 110 power cable, like a EAC309X?

US Prices

The pricing window is showing prices in euros. How do I get US \$ pricing?
